

Company Employee System

Create the following classes:

1. Employee (Parent Class)

Properties:

- id
- name

Methods:

- work()
- showDetails()

2. Developer (inherits Employee)

Property:

- language

Method:

- writeCode()

Override work() method.

3. FrontendDeveloper (inherits Developer)

Property:

- framework

Method:

- buildUI()

Override work() method.

4. Manager (inherits Employee)

Property:

- teamSize

Method:

- conductMeeting()

Override work() method.

Create Objects

Employee:
101, A

FrontendDeveloper:
102, B, JavaScript, React

Manager:
103, C, 10

Call Methods

```
employee.work();  
employee.showDetails();
```

```
frontendDev.work();  
frontendDev.writeCode();  
frontendDev.buildUI();
```

```
manager.work();  
manager.conductMeeting();
```

Inheritance Used

```
      Employee  
     /    \  
Developer  Manager  
   |  
FrontendDeveloper
```
