Flexbox

The Flexible Box module, or just 'flexbox' for short, is a box model designed for user interfaces, and it allows users to align and distribute space among items in a container such that elements behave predictably when the page layout must accommodate different, unknown screen sizes. A flex container expands items to fill available space and shrinks them to prevent overflow.

Dynamic Vertical and Horizontal Centering

Property	Value	Description
----------	-------	-------------

<code>align-items</code>	<code>center</code>	
--------------------------	---------------------	--

This centers the elements along the axis other than the one specified by `flex-direction`, i.e., vertical centering for a horizontal flexbox and horizontal centering for a vertical flexbox.

<code>justify-content</code>	<code>center</code>	
------------------------------	---------------------	--

This centers the elements along the axis specified by `flex-direction`. I.e., for horizontal (`flex-direction: row`) flexbox, this centers horizontally, and for a vertical flexbox (`flex-direction: column`) flexbox, this centers vertically)

justify-content: center on a horizontal flexbox

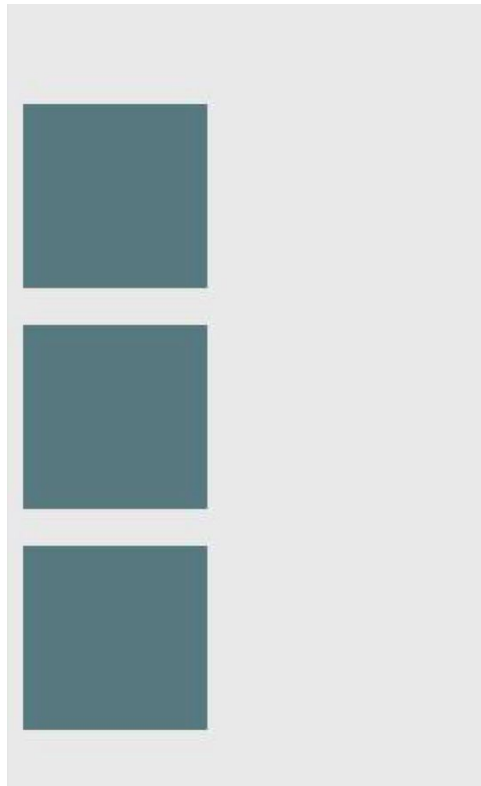

CSS:

```
div#container {  
  display: flex;  
  flex-direction: row;  
  justify-content: center;  
}
```

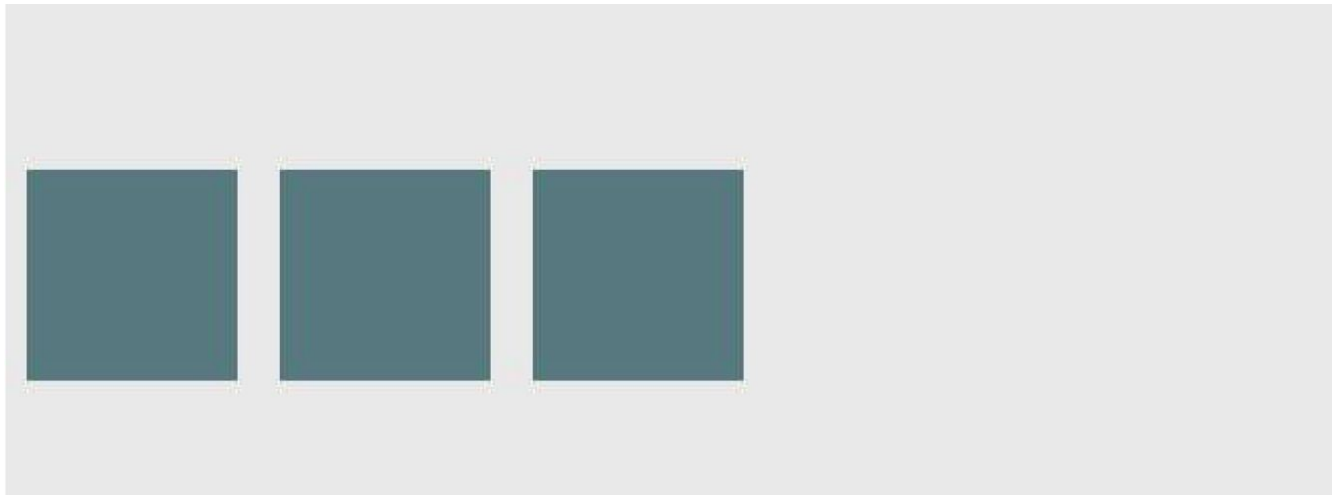

justify-content: center on a vertical flexbox

```
div#container {  
  display: flex;  
  flex-direction: column;  
  justify-content: center;  
}
```

align-content: center on a horizontal flexbox

```
div#container {  
  display: flex;  
  flex-direction: row;  
  align-items: center;  
}
```

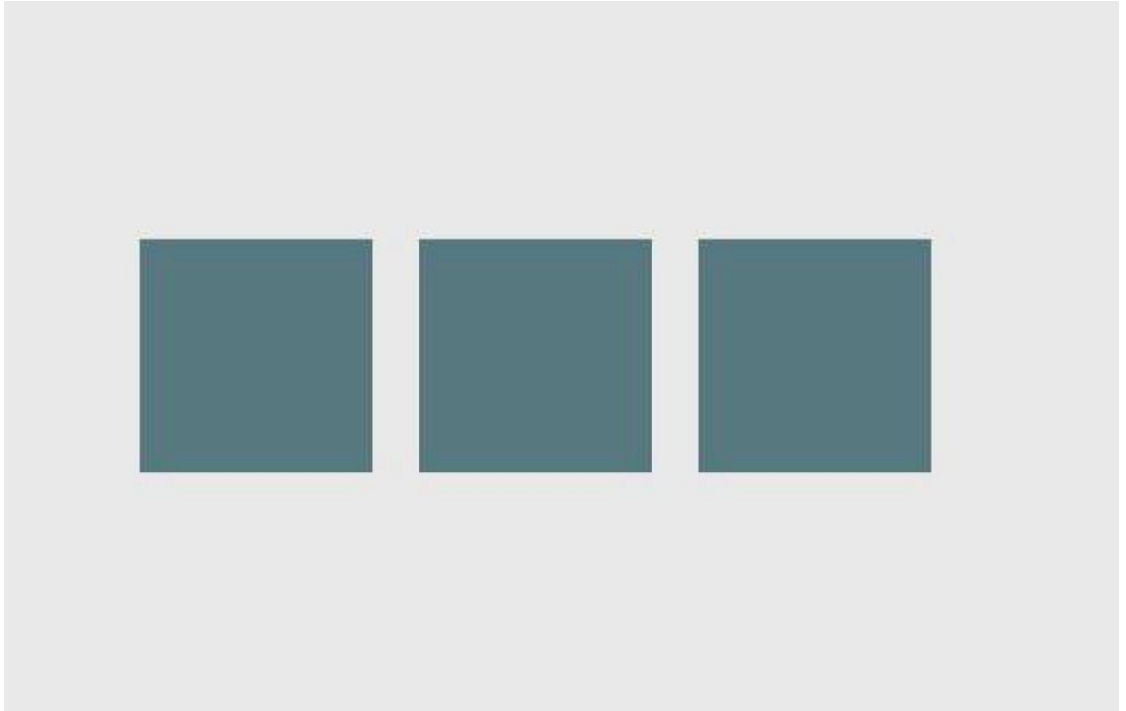

align-content: center on a vertical flexbox

```
div#container {  
  display: flex;  
  flex-direction: column;  
  align-items: center;  
}
```

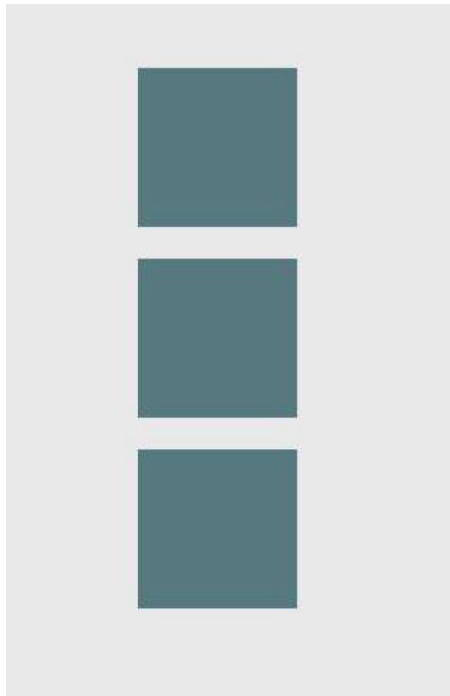

Combination for centering both on horizontal flexbox

```
div#container {  
  display: flex;  
  flex-direction: row;  
  justify-content: center;  
  align-items: center;  
}
```

Combination for centering both on vertical flexbox

```
div#container {  
  display: flex;  
  flex-direction: column;  
  justify-content: center;  
  align-items: center;  
}
```

Align-items and Align-content

Flex start

Flex end

Space between

Space around

Space evenly

Main Features

Feature	Property
Direction	<code>flex-direction</code>
Wrapping	<code>flex-wrap</code>
Horizontal Alignment	<code>justify-content</code>
Vertical Alignment	<code>align-items</code>
Multiple Row Alignment	<code>align-content</code>
Spacing	<code>gap</code>
Item Ordering	<code>order</code>
Item Growth	<code>flex-grow</code>
Item Shrinking	<code>flex-shrink</code>

Task

Sneakers

A pair of comfortable sneakers made from high-quality materials.
